DETAILED ACTION

1. A preliminary amendment was received from the applicant on March 17, 2006.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Karasek (US 6,250,231).

Karasek discloses the same articulated vehicle as claimed, as shown in Figures 1-3, that is comprised of at least two carriages, defined as Parts #1 and 10, that are coupled by upper and lower articulated connections, as shown in Figure 1, that permit turning movements about a vertical axis, where at least one upper articulated connection is configured to carry out pitching movements about a transverse axis when traveling through a depression, as shown in Figure 1, said upper articulated connection including a connecting element that is connected to said at least two carriages to permit pivoting and rolling movements about a longitudinal axis, as shown in Figures 2 and 3.

Allowable Subject Matter

4. Claims 2-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sugimoto et al. (US 6,167,814), Jeunehomme (US 5,197,392), Timan (US 5,052,707) and Hagin (US 4,421,339) disclose vehicles with articulated connections.

6. Any inquiry concerning this communication from the examiner should be directed to Exr. Lars Olson whose telephone number is (571) 272-6685.
